

PCA-CX-14.3: Engagement Completion Document

Company Name: Brahmayya and Co.
Balance Sheet Date: 01 Sep 2025
Completed By: Admin
Date: 01 Sep 2025

Instructions

In connection with each engagement, AS 1215 requires the auditor to identify all significant findings or issues, actions taken to address them, and the basis for the conclusions reached in an engagement completion document. Significant findings or issues are substantive matters that are important to the procedures performed, evidence obtained, or conclusions reached, and include, but are not limited to, the matters listed in this form. Use the "Engagement Completion Document—Interim Review" at PCA-IR-7 to document significant findings identified when performing interim reviews. Note, however, that this engagement completion document (prepared in connection with the annual audit) should also include documentation of significant findings or issues identified during interim reviews.

This form provides a place for you to document these findings or issues and comply with the requirements of the standard. This form may also be used to document differences of opinion among engagement team members concerning accounting and auditing issues. For differences of opinion, use this form if, after appropriate consultation has occurred, an engagement team member disagrees with the final conclusion of the matter. You may either include all information necessary to understand the significant findings or issues, or cross-references, as appropriate, to other available supporting audit documentation. Finally, this form may be used to document significant issues, consultations, conclusions, and the basis for conclusions related to decisions to withdraw from an engagement or from both the engagement and the client relationship.

The AICPA Auditing Standards Board issued Statement on Quality Control Standard (SQCS) No. 8 (QM 10A), A Firm's System of Quality Control. Because SQCS No. 8 was issued after the adoption of the interim standards by the PCAOB, it does not apply to PCAOB engagements. However, because it imposes quality control requirements that are more comprehensive in certain areas, the authors believe auditors may consider the guidance for audits of issuers. This checklist reflects certain requirements of SQCS No. 8. [In June 2022, the ASB issued a suite of standards as part of its audit quality project, including Quality Management Standard No. 1, A Firm's System of Quality Management (SQMS No. 1) and Quality Management Standard No. 2, Engagement Quality Reviews (SQMS No. 2). The standards are effective December 15, 2025, at which time they will supersede AICPA Quality Control Standards, including SQCS No. 8.]

In November 2022, the PCAOB proposed a new quality control standard in Release No. 2022-006, A Firm's System of Quality Control and Other Proposed Amendments to PCAOB Standards, Rules, and Forms, which, if adopted, would supersede current PCAOB quality control standards. The comment period for the proposal ended on February 1, 2023. The Board is reviewing the comments received and considering next steps. See the discussion in section 1004 .

SubPoint	Remarks	WorkpaperRef
01. Fraud		
1. Identified risk that may result in a material misstatement due to fraud and performed specific procedures for the same.		
2. Assessed the identified risks after taking into account an evaluation of the entity's programs and controls.
